Seamless Roaming- Band Steering and Client Steering for seamless mobility everywhere in the house

MeshIQ

Technology for high-performance whole-home WiFi using WiFi gateway and extenders.

Key features include:
- Auto-configuration
- Single WiFi network covering both 2.4GHz and 5GHz bands
- Band steering
- Seamless client roaming
- Exceptional quality of experience (QoE)

The Multy Pro App

A subscriber self-help app, enabling simple network management features such as complete view of home network, one-click guest WiFi setup, and parental control.

Extensive Product Portfolio

Remote-Management

Multy Pro

is an advanced WiFi system that's an integration of hardware, software (MeshIQ, remote-management), and a mobile app. Together, they provide high performance corner to corner whole home WiFi coverage.

Multy Pro | Zyxel Managed WiFi System Offers

Extensive Product Portfolio
A range of wireless gateways, access points and extenders for multiple home scenarios, offering service providers the flexibility in solution selection, resulting in price and performance differentiation.

Remote-Management for Service Providers
Remote devices & services management using TR-069 and TR-181 standards for extensive diagnostics features for quick issue resolution, resulting in fewer truck-rolls and improved customer satisfaction.

MeshIQ

The Multy Pro App

By giving subscribers the connectivity they demand, Multy Pro creates a Win-Win Solution for both Service Providers and their subscribers.

Service Providers' Benefits

Generate recurring revenue

Extensive TR-181 management features for quicker issue resolution and better customer satisfaction

Fewer truck-rolls resulting in support cost savings

Analytics on network performance and user behavior for upsell opportunities

Reduce churn and keep customers happy

Find a solution that best meets your subscriber's network needs.
